Skills

Spring Boot, Java, Angular, .NET, PHP, Laravel, REST APIs, JavaScript, HTML, CSS, SQL, Git, Requirements Analysis, Technical Documentation

Experience

Digital Forensic Analyst

Huechuraba, Chile

Chilean Investigations Police (PDI)

- Gathered and analyzed functional requirements together with business users, defining key system processes and features.
- Designed and documented a solution for evidence logistics management, covering functional, technical, and business-rule requirements.
- Developed functionality using C#, .NET, Angular, and SQL Server to manage and query institutional information.
- Contributed to database design and to the implementation of solutions aimed at optimizing internal processes.
- Produced functional and technical documentation, ensuring full traceability between requirements and development.
- Coordinated with cross-functional teams to validate requirements and propose improvements to existing processes.

Full Stack Developer

Remote

Drup Spa

- Led the development of an enterprise system, owning architecture, backend, frontend, and service integration.
- Built backend and frontend features using PHP, Laravel, JavaScript, SQL, and REST APIs.
- Designed relational databases with a focus on scalability and long-term maintainability.
- Integrated multiple system modules through services and REST APIs.
- Diagnosed and resolved critical issues throughout development and testing cycles.
- Took over and completed a previously abandoned system, reducing operational errors by approximately 85%.
- Collaborated with the development team using version control and software engineering best practices.

Data Engineer

Talcahuano, Chile

Landes

- Developed data integration processes from multiple sources into a corporate Data Lake.
- Designed and implemented ETL processes that streamlined data access and analysis for the business.
- Built an AI-based solution for automated information extraction from PDF documents.
- Implemented data storage and management processes using Dataverse.
- Built Power BI dashboards for reporting and operational analysis.
- Drove continuous improvement initiatives aimed at optimizing data management and availability.

Education

Computer Science

Concepción, Chile

Universidad Católica de la Santísima Concepción
